deepblu

COSMIQ+ NOIR

COSMIQ+ LUMIN

SCUBA MODE

Measures & displays all vital dive data and performs decompression calculations for Standard Air and Nitrox.

All information is displayed on one screen as needed, including:

- Current Time
- NDL
- Current Depth
- Dive Time
- Temperature
- Deepest Depth
- Stop Time
- Ascent Rate
- Ceiling Depth

BOTTOM TIMER MODE

For use as a depth gauge and bottom timer. Gauge information includes:

- Current Depth
- Dive Time
- Average Depth
- Secondary Dive Time
- Temperature
- Current Time

The Secondary Dive Time and Average Depth can be reset during a dive by pressing the ADJUST button to help monitor staged deco stops.

FREEDIVE MODE

Displays:

- Current Depth
- Dive Time
- Temperature

Built-in Surface Interval Timer, counting down minimum surface interval and adjustable alarms for depth and time.

NITROX DIVING

Nitrox-capable, with the oxygen level adjustable between 21% and 40%.

DIVE PLANNER

Allows divers to plan out dives in advance, taking into consideration residual nitrogen levels between dives.

The pre-dive screen shows all your settings at a glance.

SAFETY FACTOR SETTINGS

3 Safety Factor settings for the decompression algorithm:

- Conservative
- Normal
- Progressive

Bühlmann ZHL-16C Algorithm
Altitude Diving
Adjustable for diving in extremely saline water
Visual and Audible Alarms

DESIGN

VALUE

DESIGN

PIXEL-LESS SCREEN DISPLAY

Bright, colored, high-contrast LCD screen with pixel-less EBTN technology.

Brightness setting gives divers control over the display backlight while diving. Easily readable in all conditions.

SOUND AND VISUAL ALARM WARNINGS

Wide range of alarms, many of which are adjustable using the Deepblu app.

The COSMIQ LCD screen is significantly brighter and easier to read than the competition.
Here it is compared to a Suunto D4i.

SIMPLE, LOGICAL, INTUITIVE

Only 2 buttons for navigation and setting selection.

Advanced settings can be set with the Deepblu app.

COSMIQ+ makes it easy so you can stay focused on your dive.

RECHARGEABLE

The lithium ion battery is rechargeable.

Just attach the magnetic USB connector to the gold-plated charger pins to recharge anytime, anywhere.

No more slow, costly factory changes.

BATTERY LIFE

The COSMIQ+ battery lasts between 7–12 hours of continuous diving, depending on brightness and power-saving settings.

It takes only 2 hours to fully recharge.

LONGEVITY

LESS HASSLE

LIMITED EXTRA COSTS

NATO WRISTBAND

Crafted from a ballistic nylon weave and equipped with stainless steel buckles for trouble-free attachment

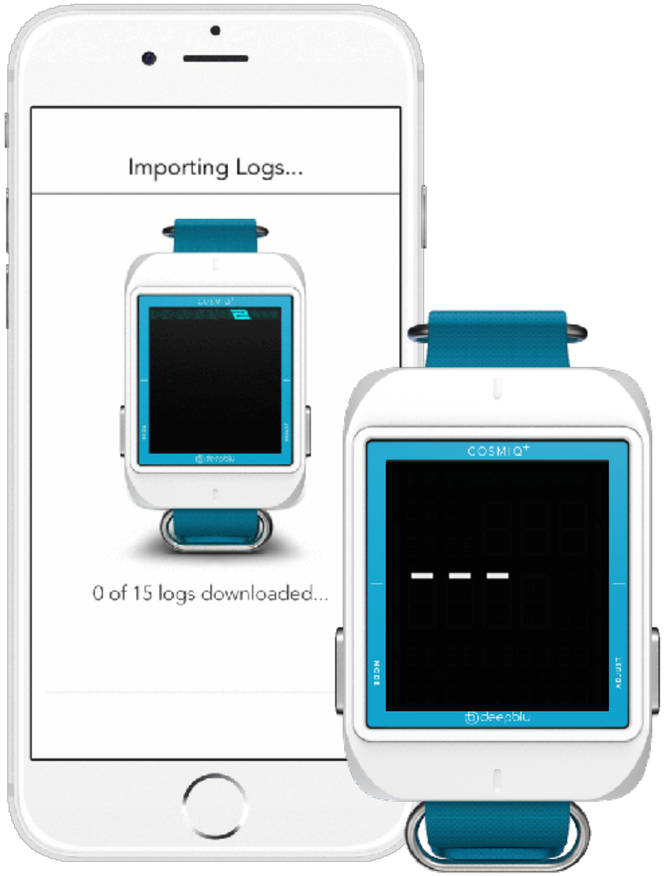
Designed to survive the wear and tear from being used for multiple dives over long periods of time, the material ensures comfort, durability, and longevity.

BUNGEE CORD

Each COSMIQ+ comes with a bungee cord that can be used as an alternative strap for those who require more flexibility.

For example, divers wearing a thick exposure suit such as a dry suit.

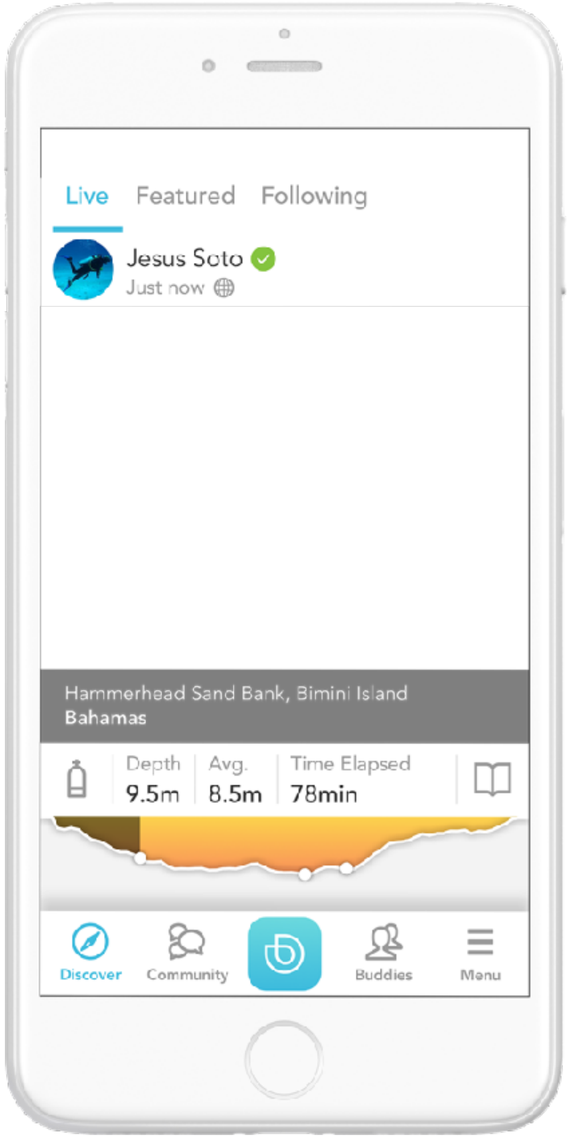
INNOVATION



WIRELESS CONNECTIVITY

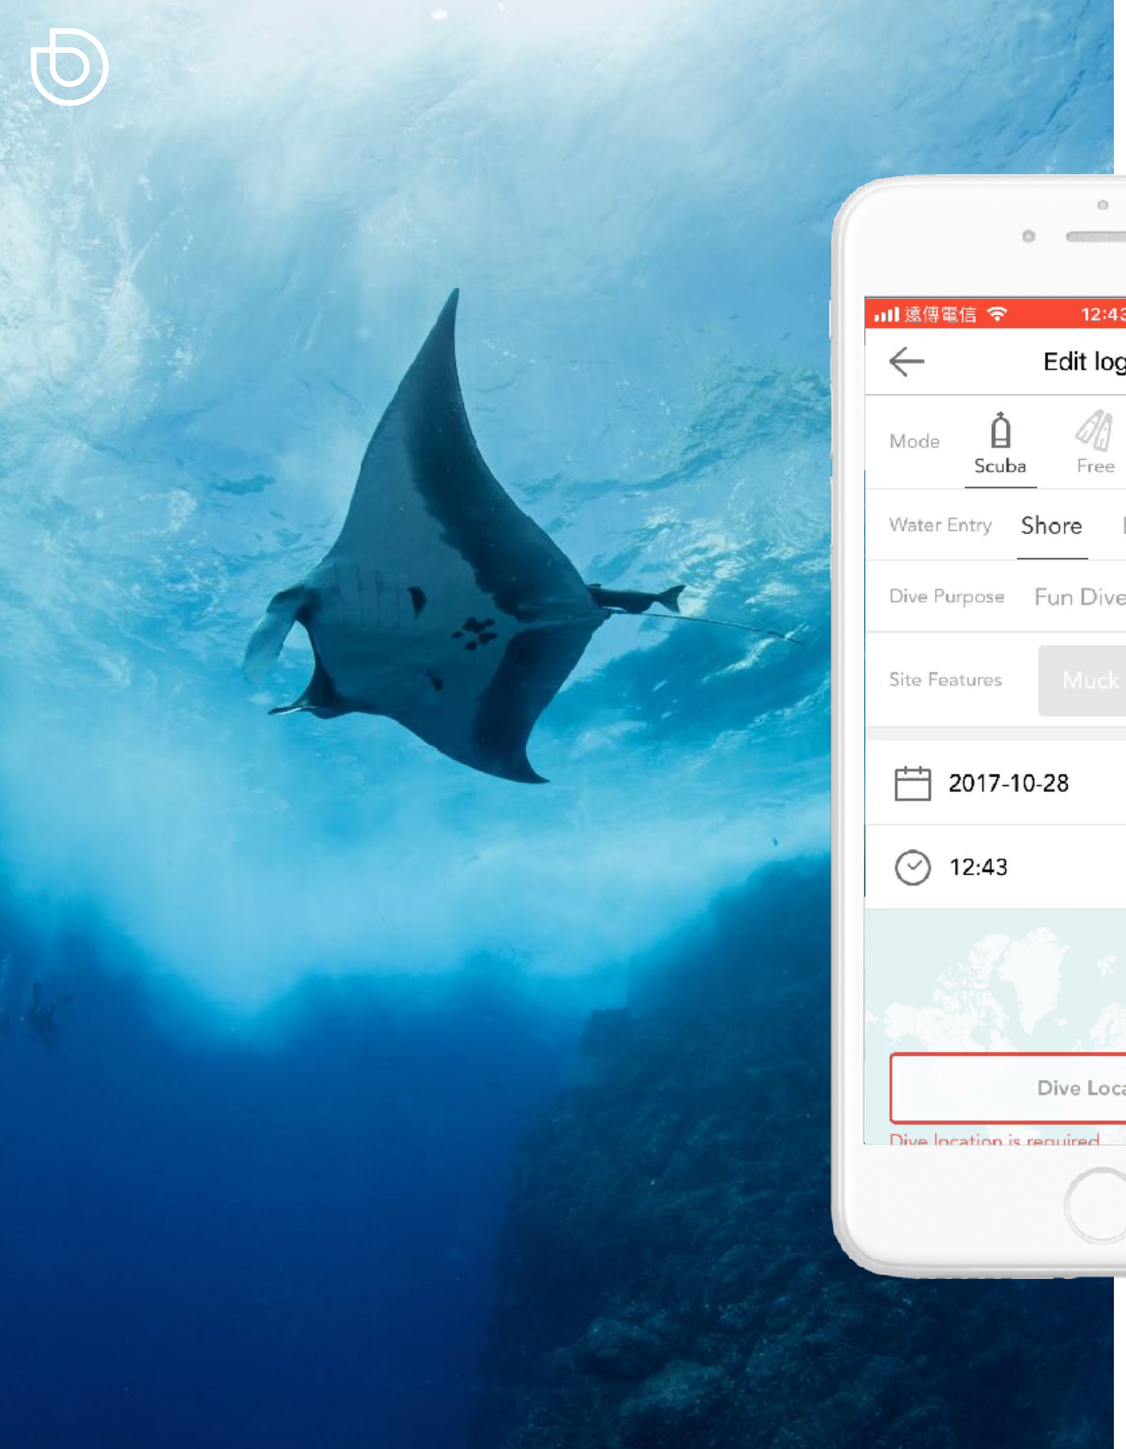
COSMIQ+ uses Blue-tooth to connect to the Deepblu app to adjust settings and upload dive data to create digital dive logs.

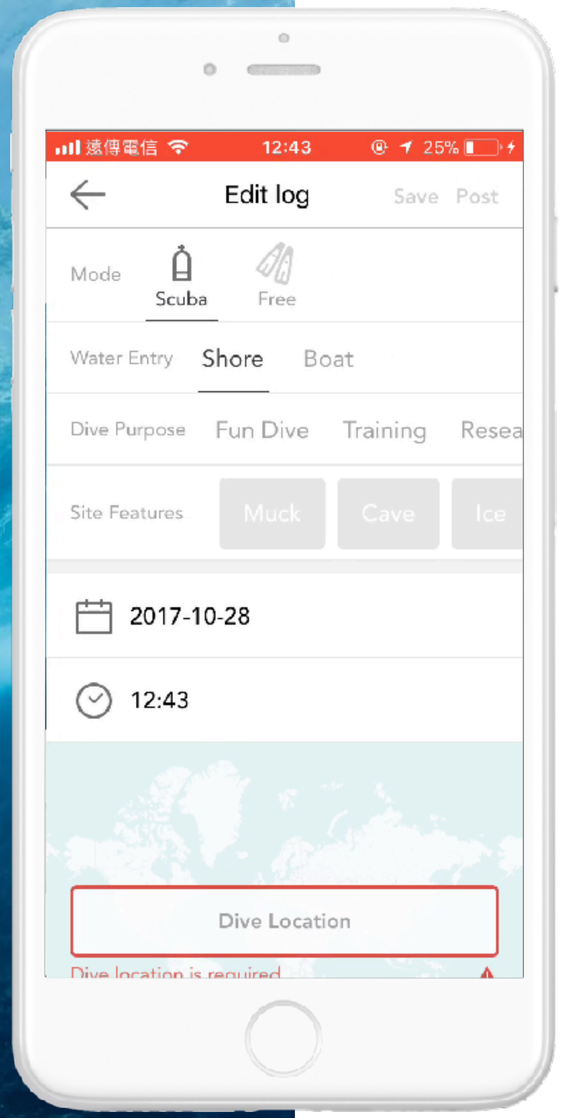
COSMIQ+ saves dive data for up to 25 dives at a time. Once 25 dives are logged, any additional dive record will overwrite the oldest log.



DEEPBLU DIGITAL DIVE LOGS

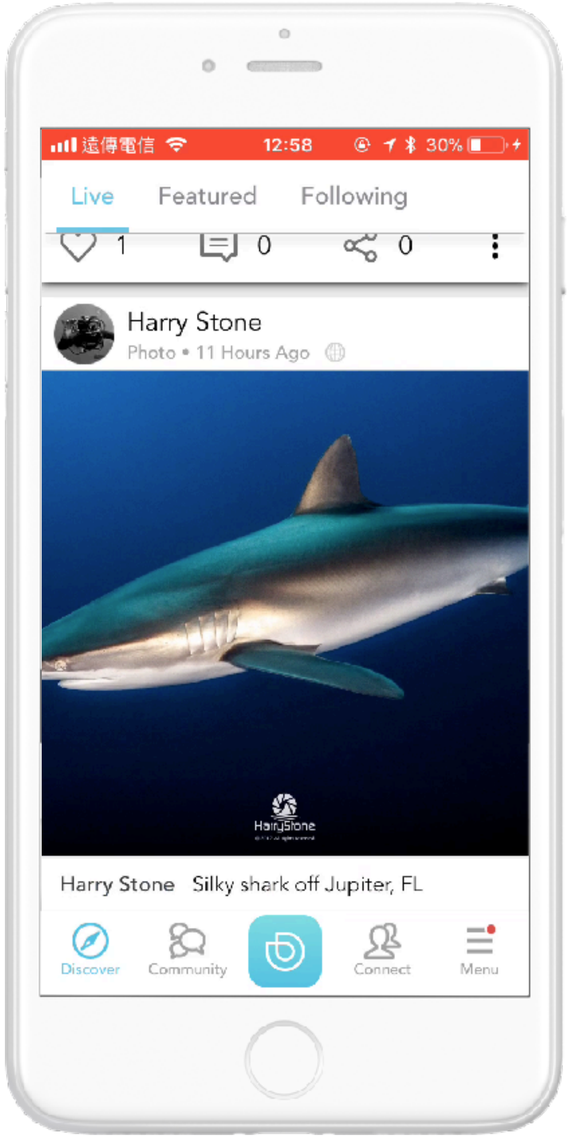
Deepblu integrates your dive data from COSMIQ+ and the pictures and videos from your digital camera. The result is an interactive dive profile that pinpoints the exact time and depth at which every photo and was taken.





COMPREHENSIVE

Pin dive location
Add pictures & videos
Tag buddy, verify logs
Input dive details



FUN & INTERACTIVE

OTA FIRMWARE UPGRADES

COSMIQ is constantly improving itself by adding new features and functions– wirelessly.

It only takes minutes to sync and upgrade.

VALUE

EVERYTHING YOU NEED IS INCLUDED...

Dive Companion

MEDIA EXPOSURE/ QUOTE

"The COSMIQ+ Dive Computer is more than just an affordable, entry level computer, COSMIQ+ is a bottle, hiding a powerful social network genie. This is the simplest way we found to describe COSMIQ+ beyond its use as a dive computer." - Reefdivers.io

"If you're looking for a new dive computer and want to be able to link your photos and videos to your dive logs, COSMIQ is a great computer for you. Plus, as part of the Deepblu community, you can now, finally, share your passion with the world." - Dive Photo Guide

With its tagline claim of being "the next innovation in dive computing," the Deepblu COSMIQ doesn't try to be bashful. Nor should it. Setting itself apart from the competition by wirelessly syncing to the corresponding Deepblu app, the COSMIQ doesn't just come into a class of its own, it's reinvented one. - DeeperBlue.com

"The two buttons keep all dive comp operations simple, and allow the diver to focus only on the essentials." " But what truly sets the Deepblu COSMIQ Dive Computer apart from other dive computers in the market is its ease of use and sharing of dive experience, photos and videos on a social network provided by a seamless platform via the Deepblu mobile app for smartphones." - DevonBuy.com

COSMIQ WARRANTY

Two-year global warranty covering manufacturing defects, faults in design and workmanship.
The warranty period begins when first activated by syncing with the Deepblu app.
